Tech Integra ERP is a web based enterprise solution with unassuming functionalities of Business Process Management, designed specifically to fit all the types of industry verticals.

Developed in a web based environment, it includes robust functionalities which are considered as a part of the extended high end enterprise application. Tech Integra ERP has the ability to work as per the requirements of any industry business process.

Even it offers the finest in technology, design, architecture, functionality, features and the ease of use which propose a great user experience.

1

FLEXIBLE DEPLOYMENT

Easy implementation within a short span of time
Can extend modules as per the requirements.

Additional worth at estimated low cost

2

MINIMUM INVESTMENT

The payment model allows "pay as you go (rental)" customer control, and avoids capital expense.

3

SEE - THROUGH PRICING

Easy to understand, no concealed fees, negotiation over price according to the processes.

4

RAPID IMPLEMENTATION, MORE ROI

Start off quickly with a product, with best-practices implementation, incrementally extend and grow the solution over time.

INTRODUCTION

1

Tech Integra ERP is an all in one integrated cloud-based ERP software solution with GST incorporation.

2

Tech Integra ERP was introduced for manufacturing industries.

Customized for retail, wholesale, trading, manufacturing for all industrial sectors like Textiles, Leather etc.

3

Our ERP software is flexible and can be customized as required and user-friendly.

One of the significant features is that unlike other ERP software in the market Tech Integra ERP doesn't require a lot of data entry on daily basis.

Why Tech Integra ERP?

1

Traditional IT systems

Traditional IT systems are mostly built with different software to cater to the seemingly unrelated department needs. Information is usually held in the large amount of data that an organization already have, such as data ranging from supply chain level to customer facing departments (e.g. sales data, stock information, customer data, market information, etc.). Within this explosion of data lie the answers that management needs to define its strategy and manage the business properly. Few examples of issues encountered in the traditional IT systems are spending too much time in piecing the varying departmental information, lack of communication between some departments, formation of duplicate data, and difficulty in scaling with a growing company. As the company grows, the old IT system is replaced with a different system and inherits the same flaws.Naturally, all this results in much inefficiency, more expenditure as well as higher cost to management that could be eliminated through and implementation of Tech Integra ERP

2

Tech Integra ERP Solution

• Tech Integra ERP is the solution aiming to help companies gain a competitive edge within the growing economy.

• As opposed to traditional ERP software, Tech Integra ERP is designed around business processes and transactions, puts the power of timely and consistent communications within reach of small to medium-sized businesses by offering superior ERP software that is affordable, adaptable, and scalable, ensuring that companies always have exactly the solution they need.

3

A strategic tool that will evolve with your company

•Tech Integra ERP will always be a strategic tool that will evolve, as your business needs changes. With its multi-feature architecture, it can cater to any domain needs.
• Multi-Organization (Different organizational entities can share data or make sure that private data is not accessible by other entities).
• Multi-Products/Services (From any type of products, items, services or even resources according to the nature of the business).
• Multi-Currency (ability to make any transaction in foreign currencies).
• Multi-Accounting and Multi-Costing (can maintain in parallel different accounting schemas as well as various costing methods).
• Multi-Language (interface screens and reports in many languages), Multi-Tax (Tech Integra ERP tax matrix can handle any tax system).

4

Services & Support

• A dedicated team of industry experts having decades of experience in a vast field of domains. We work in a number of service engagement models that help you to identify, analyze and take action on your key business drivers.

• Now you can connect to the systems and processes throughout the enterprise and optimize the value of your technology investments.

• We fully stand behind our product and services. Our top priority is customer success as it directly reflects our success. Our trained customer care personnel are always on standby to provide immediate backup to your support requests.

• A complete web based customized solutions.

• A team with good knowledge and expertise to implement Tech Integra ERP.
